## Appendix D: Nonresponse Analysis

## Appendix D: Nonresponse Analysis

Nonresponse in the O*NET Data Collection Program can occur from any of three sources. Establishments can cause nonresponse when they fail to participate at the verification, screening, recruiting, or sampling stage of selection. This type of nonresponse is referred to as establishment nonresponse. A second type of nonresponse, referred to as employee nonresponse, occurs at the employee level when a selected employee fails to complete and return a questionnaire. Finally, employees who return their questionnaires may inadvertently or intentionally skip one or more items on the questionnaire. This type of missing data is known as item nonresponse. These three types of nonresponse are discussed here.

The data analyzed here come from the Establishment Method data included in Analysis Cycles 16-18. ${ }^{1}$ Data from the Occupation Expert (OE) Method does not lend itself to this type of analysis: OE Method respondents are not sampled through establishments and are often volunteer respondents not related to a target population from which bias can be measured.

## D. 1 How Nonresponse Is Related to Bias

Nonresponse bias is the expected difference between an estimate from the responding cases and an estimate from all cases originally selected from the target population. The extent to which nonresponse bias occurs ultimately depends on (1) the extent of missing data and (2) the difference in an estimate between respondents and nonrespondents. For example, consider the equation

$$
\begin{equation*}
\bar{X}=p_{R} \bar{X}_{R}+p_{N} \bar{X}_{N}, \tag{1}
\end{equation*}
$$

which says that an overall population estimate, $\bar{X}$, depends on the proportion of respondents and nonrespondents (denoted $p_{R}$ and $p_{N}$, respectively, with $p_{R}+p_{N}=1$ ) and the mean response from both respondents and nonrespondents (denoted $\bar{X}_{R}$ and $\bar{X}_{N}$ ). Bias due to nonresponse is given by the equation

$$
\begin{equation*}
\operatorname{Bias}\left(\bar{X}_{R}\right)=\bar{X}_{R}-\bar{X}, \tag{2}
\end{equation*}
$$

[^0]demonstrating that bias varies as a function of the overall population estimate and the mean response from respondents. In the estimate, the bias due to nonresponse increases as the difference between $\bar{X}_{R}$ and $\bar{X}$ increases. Now, substituting Equation (1) into Equation (2) gives
\[

$$
\begin{equation*}
\operatorname{Bias}\left(\bar{X}_{R}\right)=\bar{X}_{R}\left(1-p_{R}\right)-p_{N} \bar{X}_{N}, \tag{3}
\end{equation*}
$$

\]

and because $1-p_{R}=p_{N}$, Equation (3) can be expressed as

$$
\begin{equation*}
\operatorname{Bias}\left(\bar{X}_{R}\right)=p_{N}\left(\bar{X}_{R}-\bar{X}_{N}\right) \tag{4}
\end{equation*}
$$

Equation (4) reveals that the components of nonresponse bias depend on the proportion of nonrespondents in the eligible sample and the difference between mean responses for respondents and those for nonrespondents. If either or both components are small, then the bias should also be small. If important biases occur, usually a substantial proportion of nonrespondents ( $p_{N}$ ) exists and there is a large difference between the mean responses (Kish, 1965). When one uses sample data to approximate bias, the components $p_{N}, \bar{X}_{R}$, and $\bar{X}_{N}$ can be estimated with sample data across attributes that can be measured for both respondents and nonrespondents. Unless a special nonresponse follow-up study is conducted, it is rarely possible to measure any of the primary study outcome variables on the nonrespondents; if any such data existed, they would be on respondents. Thus, to obtain surrogates for the primary outcome variables, it is necessary to turn to other variables, those available for both respondents and nonrespondents. If respondent data indicate that the surrogate variables are related to the primary outcome variables, then any nonresponse bias, or lack thereof, observed in the surrogate variables can be inferred to the primary outcome variables. Such approximations are not deterministic but can evince potential nonresponse bias.

The likelihood of missing data may be related to an observed variable, such as the number of employees in a business establishment. For example, employees from larger establishments may be less likely to respond than employees from smaller establishments. Analyzing work activities, work context, or knowledge across jobs within an occupation could therefore be subject to bias if the work performed differs systematically by establishment size-that is, if employees in larger establishments tend to respond differently from employees in smaller establishments. In this hypothetical example, employees in larger establishments may be less likely to respond, and if they do respond, they may respond differently from employees in smaller establishments. This situation would cause both components of nonresponse bias $\left(p_{N}\right.$ and $\left.\bar{X}_{R}-\bar{X}_{N}\right)$ to be magnified.

In general, restricting an analysis to only those cases that are observed may introduce bias into the results unless the missing-data mechanism is accounted for in the analysis (Graham, Hofer, \& Piccinin, 1994; Little \& Rubin, 1987; Schafer, 2000). Weighting is one common method of adjusting for nonresponse patterns on the basis of observed values (Little \& Rubin, 1987). The O*NET Data Collection Program incorporates weighting as one method for protecting against the influence of nonresponse bias. ${ }^{2}$

[^1]
## D. 2 Establishment Nonresponse

Exhibit D-1 displays the establishment eligibility and response rates for Analysis Cycles 16-18 by stage of data collection; Exhibit D-2 compares the distribution of respondents and nonrespondents across various establishment attributes. (All exhibits are at the end of this appendix.) The analysis population of establishments includes any establishment that had at least one of its assigned occupations published in Analysis Cycles 16-18, whether or not any of the occupations were eventually selected from that establishment. ${ }^{3}$ The rates and distributions are presented separately by various variables to allow examination of the possibility of nonresponse bias. These variables were selected because they were available for both respondents and nonrespondents and were likely to be related ${ }^{4}$ to the primary outcome variables of the O*NET Program.

The following describes the major row headings within Exhibits D-1 and D-2:

- Census Division is assigned according to the address of the establishment.
- Total Employees in Establishment is the establishment's total employment estimate on the sample frame. The category unknown for total employees in an establishment is an actual frame classification.
- SIC Division is the Standard Industry Classification of the establishment.
- NAICS Sector is the North American Industry Classification System of the establishment.
- Number of Occupations on Establishment Sampling List is the number of occupations linked to an establishment's sampling list. This number may be viewed as a measure of the point of contact's (POC's) perceived level of burden.
- Time Zone and Metropolitan Status were assigned according to the establishment's ZIP code.

## D.2.1 Establishment Final Unweighted Response Rates

Exhibit D-1 displays the establishment eligibility and response rates for Analysis Cycles 16-18 by stage of data collection.

The following describes the Exhibit D-1 column headings:

- Total Estab is the total number of selected establishments at the verification stage.
- Verification, Screening, Recruiting, and Sampling refer to the four stages of data collection used in recruiting establishments. Only those establishments that responded at the previous stage were used in the computation of rates. For example, screening rates reflect only establishments that responded at the verification stage. Final rates are combined rates across all stages of data collection. All establishments are considered to be eligible at the verification stage. At subsequent stages, nonrespondents from the previous stage are removed from the denominator of the eligibility rate; therefore, the final eligibility rate, defined as the total number of eligible establishments divided by the total establishments in the sample, is not equivalent to the product of the eligibility rates at each stage. Similarly, establishments that

[^2]were identified as ineligible in the previous stage are not included in the denominator of the response rate for a particular stage. Thus, the final response rate, defined as the total number of responding establishments divided by the total number of eligible establishments in the sample, is not the product of the response rates at each stage.

- Elig is the percentage of establishments that are considered eligible. Establishments are considered survey eligible if they are classified as (1) at the same street address or building as in the sampling frame, (2) in business (permanently or temporarily), (3) able to be located, and (4) not a duplicate.
- Resp is the percentage of eligible establishments that are considered respondents; that is, they did not refuse to participate in the study. This includes participating establishments where none of the target occupations were present.
The data in Exhibit D-1 reveal that the final unweighted response rate for establishments was $70.6 \%$. The final eligibility rate was $80.8 \% .^{5}$ The data also indicate that response rates varied for the four data collection stages, with the lowest response rate occurring at the recruiting stage ( $82.4 \%$ ) and the lowest eligibility rate occurring at the verification stage ( $83.5 \%$ ). These results are intuitive for the following reasons:
- Typically, it was not until the recruiting stage of data collection that the POC realized the burden involved in participation. Consequently, it was expected that most nonresponse would occur at this stage.
- The lowest eligibility rate was expected at the verification stage, when each establishment was first contacted and when establishments that closed or moved their businesses were first identified.

Using frame information, one can compare the respondents and nonrespondents across various attributes to approximate nonresponse bias. An estimate of the first source of nonresponse bias can be found in Exhibit D-1 under the column headed Final Resp. As mentioned above, low response rates indicate possible nonresponse bias. The response rate for each level of a specific attribute was compared against the overall value to determine whether the difference was significant. This assessment was conducted separately for each stage of data collection. Differences statistically significant at the 0.05 level are indicated with an asterisk (*). ${ }^{6}$

Census Division. Establishments in the West North Central region (74.1\%) had the highest significant final response rate, whereas the Middle Atlantic region (67.7\%) had the lowest significant final response rate.

Total Employees in Establishment. Across all establishment size categories except Unknown, a general decreasing trend appears in the final response rates as the size of the establishment increases. This pattern suggests that the perceived burden on the POCs in smaller establishments may have been lower than the perceived burden on the POCs in larger establishments. In addition, in larger organizations,

[^3]participation may not be at the discretion of the POC but instead may require corporate approval. This observation is consistent with those in other literature (e.g., Willimack, Nichols, \& Sudman, 2002).

SIC Division. Comparing the different SIC divisions with the overall final response rate, one sees that Public Administration ( $83.0 \%$ ) had the highest significant final response rate, whereas the Retail Trade (59.4\%) industry had the lowest significant final response rate. ${ }^{7}$

NAICS Sector. Comparing the different NAICS sectors to the overall final response rate, one sees that Public Administration ( $83.0 \%$ ) had the highest significant final response rate, and Accommodation and Food Service (51.6\%) had the lowest significant final response rate. ${ }^{7}$

Number of Occupations on Establishment Sampling List. The final response rate for establishments with $1-5$ occupations on the sampling list was significantly higher than the overall final response rate ( $74.4 \%$, as opposed to $70.6 \%$ ), and establishments with 10 occupations on the sampling list had the lowest significant final response rate ( $52.0 \%$ ). A decreasing trend in response rates appears to be generally correlated with an increase in the number of occupations on the establishment sampling list.

Time Zone. Establishments in the Alaska Standard Time zone had the highest significant final response rate $(83.0 \%)$. No time zones were significantly lower than the overall rate of $70.6 \%$.

Metropolitan Status. Rural establishments had a final response rate significantly higher than the overall response rate ( $76.3 \%$ vs $70.6 \%$ ), whereas urban establishments had a significantly lower final response rate ( $69.3 \%$ ).

## D.2.2 Comparison of Establishment Respondents and Nonrespondents

Exhibit D-2 compares the distribution of respondents with the distribution of nonrespondents across various establishment attributes. The column showing Percent Difference (Resp vs. Nonresp) gives an estimate of the second component of the nonresponse bias formula (Equation [4]). An estimate of the nonresponse bias across an attribute (see Equation [2]) is shown under the final column, Percent Difference (Resp vs. Overall). As discussed above, a potential source of nonresponse bias occurs when this difference becomes large. Differences in the final column marked with an asterisk are statistically different from zero at the 0.05 level. Large positive or negative values indicate possible nonresponse bias. Although numerous statistically significant differences exist, large sample sizes tend to increase the likelihood that very small differences will be statistically significant. In this situation, it is important to determine whether the differences are of sufficient magnitudes to be meaningful. For establishment nonresponse, the differences between respondents and the overall sample do not appear to be meaningful: $84.1 \%$ of the attributes had an absolute difference of less than 1 percentage point, $12.7 \%$ had an absolute difference of $1-2$ percentage points, and $3.2 \%$ had an absolute difference of 2 or more percentage points. ${ }^{8}$

[^4]Another measure of potential nonresponse bias is the effect size, as defined by (Cohen, 1988). In this case, the effect size is related to the chi-square test for comparing the equivalence of percentage distributions from respondents with those of the overall sample. The effect size, $w$, is calculated using the following formula:

$$
\begin{equation*}
w=\sqrt{\sum_{i=1}^{m} \frac{\left(p_{o i}-p_{1 i}\right)^{2}}{p_{o i}}} \tag{5}
\end{equation*}
$$

where $m$ represents the number of categories (e.g., Census division), $p_{0 i}$ is the overall distribution, and $p_{1 i}$ represents the distribution among the respondents.

Under the guidelines suggested by Cohen, an effect size is classified as "small" when it is about 0.10 , as "medium" when it is about 0.30 , and as "large" when it is about 0.50 . For the variables in Exhibit D-2, all of the effect sizes were small, with the largest effect size being equal to 0.11 for Number of Occupations on Establishment Sampling List. These results suggest that the distribution of the variables for respondents and that for nonrespondents are quite similar (i.e., $\bar{X}_{R}-\bar{X}_{N}$ is small).

The combination of relatively small absolute differences and small effect sizes indicates a low likelihood of bias due to establishment nonresponse.

## D. 3 Employee Nonresponse

Like establishment nonresponse, employee nonresponse is difficult to thoroughly characterize in the O*NET Data Collection Program because relatively little information is known about the nonrespondents (except for some descriptive frame characteristics). However, as with the establishment level, using information known about both responding and nonresponding employees enables indirect determination of whether the nonrespondents are different from the respondents across variables that may be highly correlated with the survey data being collected. In this way, potential sources of nonresponse bias can be approximated at the employee level.

Exhibit D-3 displays the unweighted response rates for employees; Exhibit D-4 compares the distribution of respondents and nonrespondents across various employee attributes from Establishment Method data collection for occupations published in Analysis Cycles 16-18.9

In addition to the categories displayed in Exhibits D-1 and D-2, Exhibits D-3 and D-4 also display response rates by the following employee-level characteristics (rows):

- Total Selected Employees in Establishment is the number of employees who were selected from the establishment. Note that this value ranges only from 1 to 20. This range reflects the rule that no more than 20 employees may be selected from any single establishment per 12-month period.

[^5]- Questionnaire Type is the type of questionnaire that the employee was selected to complete. There are three questionnaire types: Work Activities, Work Context, and Knowledge.
- Occupation Class is derived from the first two digits of the O*NET occupation code.

The response rates are presented separately by the various row variables to reveal any possibility of nonresponse bias. These variables were selected because they were available for both respondents and nonrespondents and were likely to be related ${ }^{10}$ to the primary outcome variables of the $\mathrm{O} *$ NET Program.

## D.3.1 Employee Final Unweighted Response Rates

An estimate of the second source of nonresponse bias can be found in Exhibit D-3 under the column headed Response Rate. As discussed in Section D-1, low response rates may indicate nonresponse bias. RTI assessed the response rate for each level of a specific covariate against the overall value to determine whether the difference was significant. Differences statistically significant at the 0.05 level are indicated with an asterisk (*). ${ }^{11}$

Census Division. Employees in the East South Central region had the highest significant response rate ( $67.8 \%$ ), whereas employees in the Pacific region had the lowest significant response rate ( $59.0 \%$ ). The overall response rate was $62.9 \%$.

Total Employees in Establishment. The response rate for employees from establishments with $1-4$ employees had the highest significant response rate ( $69.5 \%$ ). The lowest significant response rate was for employees from establishments with 1,000-4,999 employees (59.5\%). The overall response rate was 62.9\%.

SIC Division. Employees in the Finance, Insurance, Real Estate industry had the highest significant response rate (68.5\%). Employees from the Transportation, Communication, Electric, Gas, and Sanitary Services industry had the lowest significant response rate (54.8\%).

NAICS Sector. Employees in the Other Services, Except Public Administration sector had the highest significant response rate (71.9\%). ${ }^{12}$ Employees in the Transportation and Warehousing sector had the lowest significant response rate (49.4\%).

Total Selected Employees in Establishment. The highest significant response rate was for employees from establishments with only 1 selected employee ( $73.4 \%$ ). The lowest significant response rate was for employees from establishments with 19 employees selected ( $40.2 \%$ ).

Questionnaire Type. The Work Context questionnaire had a significantly higher response rate (64.9\%) than the overall response rate of $62.9 \%$. The Work Activities questionnaire had the lowest significant response rate (61.6\%).

[^6]Number of Occupations on Establishment Sampling List. None of the response rates for the Number of Occupations on the Establishment Sampling List were significantly different from the overall rate.

Occupation Class. Community and Social Services Occupations had a significantly higher response rate $(73.0 \%)$ than the overall response rate ( $62.9 \%$ ). Healthcare Support Occupations had the lowest significant response rate $(41.4 \%) .{ }^{13}$

Time Zone. The response rate in the Eastern Standard Time zone (64.4\%) was significantly higher than the overall response rate ( $62.9 \%$ ). The response rate in the Pacific Standard Time zone (58.5\%) was significantly lower than the overall response rate.

Metropolitan Status. The response rate for employees in a rural area was significantly higher than the overall response rate ( $65.3 \%$ and $62.9 \%$, respectively), and the response rate for employees in an urban area was significantly lower ( $62.1 \%$ ).

## D.3.2 Comparison of Employee Respondents and Nonrespondents

Exhibit D-4 presents a comparison of the distribution of respondents and nonrespondents across various employee attributes. The column Percent Difference (Resp vs. Nonresp) reveals an estimate of the second component of the nonresponse bias formula (see Equation [4]). The column Percent Difference (Resp vs. Overall) shows an estimate of the nonresponse bias across an attribute (see Equation [2]). As discussed above, a potential source of nonresponse bias occurs when this difference becomes large. Resps vs. Overall differences marked with an asterisk are statistically different from zero at the 0.05 level. Large positive or negative values indicate possible nonresponse bias. Although numerous statistically significant differences exist, large sample sizes tend to increase the likelihood that very small differences will be statistically significant. In this situation, it is important to determine whether the differences are of sufficient magnitudes to be meaningful. For employee nonresponse, the differences between respondents and the overall sample do not appear to be meaningful; for example, $92.5 \%$ of the attributes had an absolute difference of less than 1 percentage point, and the remaining $7.5 \%$ had an absolute difference of $1-2$ percentage points. ${ }^{11}$

Another measure of potential nonresponse bias is the effect size, as defined by (Cohen, 1988). See Section D. 2.2 for a full explanation. The combination of small absolute differences and very small effect sizes indicates a low likelihood of bias due to employee nonresponse.

## D. 4 Item Nonresponse

Exhibits D-5 through D-11 display unweighted item response rates by item, item type, and occupation for Establishment Method data included in Analysis Cycles 16-18. These tables include questionnaire data from employee respondents in the occupations published in Analysis Cycles 16-18 and completed under the Establishment Method. Only items from those questionnaires that satisfied all

[^7]completeness and quality requirements were evaluated. Cases that did not satisfy such requirements were included as employee nonrespondents.

Item nonresponse is analogous to partial-information patterns in which some variables are observed and some are missing. Even though partial information is present, item nonresponse can still create biased parameter estimation if the missing values are systematically related to the outcome (e.g., wealthy respondents tend to leave an income question unanswered).

Work Activities, Work Context, and Knowledge. The data in Exhibits D-5 through D-7 suggest that, for the Work Activities, Work Context, and Knowledge Questionnaires, little item nonresponse exists with respect to any single item on any questionnaire. The lowest response rate for any specific item in each questionnaire is $93.2 \%$ for Work Activities Questionnaire Item 40 (Level), $97.7 \%$ for Work Context Questionnaire Item 49, and $88.2 \%$ for Knowledge Questionnaire Item 8 (Level). In addition, as seen in Exhibit D-10, item nonresponse is slightly more prevalent for Level items than for Importance items, regardless of questionnaire type.

Occupation-Specific Tasks. It appears from Exhibit D-8 that item nonresponse may be more serious for certain Frequency and Importance items than for others and for some occupations more than others (e.g., 51-9194.00, Etchers and Engravers, accounted for 3 of the top 10 lowest item response rates). It should be noted, however, that the eligible sample size is small for these Frequency and Importance items because a responding employee is not required to respond to the corresponding Frequency and Importance item if he or she does not consider a task to be relevant. Most of the Frequency and Importance items with a low response rate were suppressed from publication because they were also found to be not relevant to the occupation (i.e., too few respondents rated the task as relevant).

Background Questionnaire. In Exhibit D-9, the item response rates appear to be nearly constant and high (nearly $93 \%$ or greater), with the exception of Item 4 ( $88.7 \%$ ), which elicits information from the respondent about working in a family business.

Item Type. All the response rates by item type were $95.5 \%$ or higher (Exhibit D-10).
Occupation. Item response rates are provided in Exhibit D-11 for all occupations completed in Analysis Cycles 16-18. The overall item response rate was $97.6 \%$, with the lowest response rate, $90.3 \%$, coming from Pressers, Textile, Garment, and Related Materials (occupation code 51-6021.00). The highest response rate, 99.4\%, came from Actors (occupation code 27-2011.00).

The extremely high item response rates indicate a low likelihood of bias due to item nonresponse.

## D. 5 Conclusion

Unit and item nonresponse can lead to biased inferences if the nonresponse rates are high and respondents and nonrespondents differ with regard to the characteristics of interest. An examination of both establishment and employee response rates revealed that nonresponse patterns were somewhat related to essentially all variables considered in the analyses; however, when examined, the distribution of respondents and nonrespondents across various frame attributes showed that the overall potential for nonresponse bias at both the establishment and employee levels was negligible. Because nonresponse
patterns for both establishments and employees are related to the substantive variables measured in the study, using these variables for nonresponse adjustments to the analysis weights should be effective in reducing the minimal effects, if any, due to nonresponse bias in the analysis.

At the item level, it was found that different questionnaire types and questions exhibited varying response rates, and in most cases the response rates were extremely high. This finding coincides with the findings at the establishment and employee levels-that is, that the potential for significant nonresponse bias due to item nonresponse is negligible.

Exhibit D-1. Establishment Eligibility and Response Rates (Percent)

| Category | Total Estab | Verification |  | Screening |  | Recruiting |  | Sampling |  | Final |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Elig | Resp | Elig | Resp | Elig | Resp | Elig | Resp | Elig | Resp |
| Total | 56,002 | 83.5 | 98.3 | 97.8 | 91.6 | 99.5 | 82.4 | 100.0 | 95.5 | 80.8 | 70.6 |
| Census Division |  |  |  |  |  |  |  |  |  |  |  |
| New England | 3,861 | 83.0 | 98.1 | 97.3 | 91.4 | 99.5 | 83.4 | 100.0 | 96.1 | 80.0 | 71.5 |

Note: Response rates were calculated from those establishments that were classified as eligible at each step. Final rates are combined rates across all stages of data collection. All establishments are considered to be eligible at the verification stage. At subsequent stages, nonrespondents from the previous stage are removed from the denominator of the eligibility rate; therefore, the final eligibility rate, defined as the total number of eligible establishments divided by the total establishments in the sample, is not equivalent to the product of the eligibility rates at each stage. Similarly, establishments that were identified as ineligible in the previous stage were not included in the denominator of the response rate for a particular stage. Consequently, the final response rate, defined as the total number of responding establishments divided by the total number of eligible establishments in the sample, is not the product of the response rates at each stage. Statistical tests were conducted only for categories with two or more establishments. SIC $=$ Standard Industrial Classification. NAICS $=$ North American Industry Classification System.
*Statistically different from the total category at the 0.05 level.

| Rural | 5,927 | 25.2 | 3,148 | 22.7 | 9,075 | 24.3 | 2.5 | 0.9* |
| Urban | 17,550 | 74.8 | 10,714 | 77.3 | 28,264 | 75.7 | -2.5 | -0.9* |

Notes: Because of rounding, the difference columns may not match their constituent parts. Statistical tests were conducted only for categories with two or more employees. A dash (-) indicates that estimates do not apply because the sample was not observed for either respondents or nonrespondents.

NA $=$ not applicable, NAICS $=$ North American Classification System, SIC $=$ Standard Industrial Classification.
*Statistically different from zero at the 0.05 level.

## Exhibit D-5. Ten Lowest Item Response Rates, Work Activities Questionnaire

| Item and Description |  | Sampled | Response Rate |
| :---: | :---: | :---: | :---: |
| B40-Level | Recruiting, interviewing, selecting, hiring, and promoting employees in an organization. | 3,247 | 93.2 |
| B21-Level | Providing documentation, detailed instructions, drawings, or specifications to tell others about how devices, parts, equipment, or structures are to be fabricated, constructed, assembled, modified, maintained, or used. | 3,534 | 94.9 |
| B32-Level | Performing for people or dealing directly with the public. This includes serving customers in restaurants and stores, and receiving clients or guests. | 4,628 | 95.2 |
| B25-Level | Translating or explaining what information means and how it can be used. | 5,769 | 95.3 |
| B23-Level | Servicing, repairing, calibrating, regulating, fine-tuning, or testing machines, devices, and equipment that operate primarily on the basis of electrical or electronic (not mechanical) principles. | 3,867 | 95.4 |
| B41-Level | Monitoring and controlling resources and overseeing the spending of money. | 4,652 | 95.4 |
| B05-Level | Estimating sizes, distances, and quantities; or determining time, costs, resources, or materials needed to perform a work activity. | 5,739 | 95.7 |
| B13-Level | Establishing long-range objectives and specifying the strategies and actions to achieve them. | 5,527 | 95.7 |
| B02-Level | Identifying information by categorizing, estimating, recognizing differences or similarities, and detecting changes in circumstances or events. | 6,576 | 95.9 |
| B30-Level | Convincing others to buy merchandise/goods or to otherwise change their minds or actions. | 4,228 | 95.9 |
| B22-Level | Servicing, repairing, adjusting, and testing machines, devices, moving parts, and equipment that operate primarily on the basis of mechanical (not electronic) principles. | 4,118 | 96.1 |
| B09-Level | Identifying the underlying principles, reasons, or facts of information by breaking down information or data into separate parts. | 5,870 | 96.2 |
| B06-Level | Assessing the value, importance, or quality of things or people. | 6,058 | 96.3 |
| B36-Level | Providing guidance and direction to subordinates, including setting performance standards and monitoring performance. | 5,061 | 96.3 |
| B39-Level | Performing day-to-day administrative tasks such as maintaining information files and processing paperwork. | 5,210 | 96.3 |

Note: 15 items are shown because of ties in response rates.

Exhibit D-6. Ten Lowest Item Response Rates, Work Context Questionnaire

| Item and Description |  | Sampled | Response Rate |
| :---: | :---: | :---: | :---: |
| D49 | How automated is the job? | 7,111 | 97.7 |
| D45 | How serious would the result usually be if the worker made a mistake that was not readily correctable? | 7,111 | 97.8 |
| D47 | How frequently is the worker required to make decisions that affect other people, the financial resources, and/or the image and reputation of the organization? | 7,111 | 98.0 |
| D09 | How important is it to coordinate or lead others in accomplishing work activities in this job? | 7,111 | 98.1 |
| D12 | How often are there conflict situations the employee has to face in this job? | 7,111 | 98.2 |
| D11 | How responsible is the worker for work outcomes and results of other workers? | 7,111 | 98.4 |
| D39 | How much does this job require keeping or regaining your balance? | 7,111 | 98.4 |
| D51 | How important is repeating the same physical activities (e.g., key entry) or mental activities (e.g., checking entries in a ledger) over and over, without stopping, to performing this job? | 7,111 | 98.4 |
| D53 | To what extent does this job require the worker to compete or to be aware of competitive pressures? | 7,111 | 98.4 |
| D10 | How much responsibility is there for the health and safety of others in this job? | 7,111 | 98.6 |
| D46 | What results do your decisions usually have on other people or the image or reputation or financial resources of your employer? | 7,111 | 98.6 |
| D15 | How often does this job require working indoors in environmentally controlled conditions? | 7,111 | 98.7 |
| D16 | How often does this job require working indoors in non-controlled environmental conditions (e.g., warehouse without heat)? | 7,111 | 98.7 |
| D28 | How often does this job require exposure to radiation? | 7,111 | 98.7 |
| D33 | How often does this job require exposure to minor burns, cuts, bites, or stings? | 7,111 | 98.7 |
| D42 | How much does this job require making repetitive motions? | 7,111 | 98.7 |
| D55 | How important is it to this job that the pace is determined by the speed of equipment or machinery? (This does not refer to keeping busy at all times on this job.) | 7,111 | 98.7 |
| D13 | How frequently does the worker have to deal with unpleasant, angry, or discourteous individuals as part of the job requirements? | 7,111 | 98.8 |
| D21 | To what extent does this job require the worker to perform job tasks in close physical proximity to other people? | 7,111 | 98.8 |
| D23 | How often does this job require working in very hot (above 90 F degrees) or very cold (below 32 F degrees) temperatures? | 7,111 | 98.8 |
| D40 | How much does this job require using your hands to handle, control, or feel objects, tools or controls? | 7,111 | 98.8 |
| D41 | How much does this job require bending or twisting your body? | 7,111 | 98.8 |
| D25 | How often does this job require working exposed to contaminants (such as pollutants, gases, dust or odors)? | 7,111 | 98.9 |
| D29 | How often does this job require exposure to disease/infections? | 7,111 | 98.9 |
| D34 | How much does this job require sitting? | 7,111 | 98.9 |
| D37 | How much does this job require walking and running? | 7,111 | 98.9 |
| D56 | How regular are the work schedules for this job? | 7,111 | 98.9 |

Note: 27 items are shown because of ties in response rates.

## Exhibit D-7. Ten Lowest Item Response Rates, Knowledge Questionnaire

| Item | Item Description | Sampled | Response <br> Rate |
| :--- | :--- | :--- | :---: |
| E08-Level | Knowledge of techniques and equipment for planting, <br> growing, and harvesting food products (both plant and animal) <br> for consumption, including storage/handling techniques. | 1,358 | 88.2 |
| E26-Level | Knowledge of the theory and techniques required to compose, <br> produce, and perform works of music, dance, visual arts, <br> drama, and sculpture. | 1,219 | 89.7 |
| E17-Level | Knowledge of plant and animal organisms, their tissues, cells, <br> functions, interdependencies, and interactions with each other <br> and the environment. | 1,895 | 92.8 |
| E27-Level | Knowledge of historical events and their causes, indicators, <br> and effects on civilizations and cultures. | 1,814 | 93.1 |
| E28-Level | Knowledge of different philosophical systems and religions. <br> This includes their basic principles, values, ethics, ways of <br> thinking, customs, practices, and their impact on human <br> culture. |  |  |
|  | Knowledge of the information and techniques needed to <br> diagnose and treat human injuries, diseases, and deformities. <br> This includes symptoms, treatment alternatives, drug <br> properties and interactions, and preventive health-care <br> measures. | 2,103 | 93.5 |
| E21-Level |  |  |  |
| E22-Level | Knowledge of principles, methods, and procedures for <br> diagnosis, treatment, and rehabilitation of physical and mental <br> dysfunctions, and for career counseling and guidance. | 2,399 | 9401 |

Note: 11 items are shown because of ties in response rates.

## Exhibit D-8. Ten Lowest Item Response Rates, Task Questionnaire

\left.| Item | Item Description | Response |
| :--- | :--- | :--- | :--- |
| Rate |  |  |$\right]$| Sampled |
| :--- |

Note: 16 items are shown because of ties in response rates.

## Exhibit D-9. Response Rates, Background Questionnaire

| Item and Description | Sampled | Response Rate |  |
| :--- | :--- | ---: | :---: |
| 2 | How long at job? | 21,124 | 99.2 |
| 3 | Employment sector | 21,124 | 97.0 |
| 4 | Family business | 21,124 | 88.7 |
| 5 | Age group | 21,124 | 95.6 |
| 6 | Gender | 21,124 | 98.4 |
| 7 | Ethnicity | 21,124 | 96.9 |
| 8 | Race | 21,124 | 92.7 |
| 9 | Education level | 21,124 | 99.0 |

Items Added to Match the Disability Questions in the American Community

| 10 | Deafness or serious difficulty hearing | 14,996 | 98.4 |
| :--- | :--- | :--- | :--- |
| 11 | Blind or serious difficulty seeing even when wearing glasses | 14,996 | 98.4 |
| 12 A | Serious difficulty concentrating, remembering, or making decisions | 14,996 | 97.5 |
| 12 B | Serious difficulty walking or climbing stairs | 14,996 | 98.4 |
| 12 C | Difficulty dressing or bathing | 14,996 | 98.2 |
| 13 | Difficulty doing errands alone because of a physical, mental, or emotional <br> condition | 14,996 | 98.2 |
| Items | Deleted to Match the Disability Questions in the American Community |  |  |
| 9A | Blindness, deafness, or other severe vision or hearing impairment | 6,128 | 98.5 |
| 9B | A condition that substantially limits one or more basic physical activities <br> such as walking, climbing stairs, reaching, lifting, or carrying | 6,128 | 98.1 |
| 10A | Difficulty learning, remembering, or concentrating | 6,128 | 96.4 |
| 10B | Difficulty bathing, or getting around inside the home | 6,128 | 96.3 |
| 10C | Difficulty going outside the home alone to shop or visit the doctor's office | 6,128 | 96.3 |
| 10D | Difficulty working at a job or business | 6,128 | 96.1 |

## Exhibit D-10. Item Response Rates by Item Type

| Item Type | Questions | Response Rate |
| :--- | :---: | :---: |
| TOTAL | $2,694,379$ | 97.6 |
| B--Work Activities--Importance | 286,795 | 98.7 |
| B--Work--Activities--Level | 228,256 | 96.6 |
| D--Work Context | 405,327 | 98.9 |
| E--Knowledge--Education and Training | 29,566 | 98.9 |
| E--Knowledge--Importance | 231,594 | 98.7 |
| E--Knowledge--Level | 126,380 | 96.4 |
| E--Knowledge--Work Styles Background | 112,288 | 99.2 |
| Background | 205,760 | 96.1 |
| Task--Relevance | 433,451 | 98.6 |
| Task--Importance | 317,481 | 96.5 |
| Task--Frequency | 317,481 | 95.5 |

Exhibit D-11. Item Response Rates by Occupation

Exhibit D-11. Item Response Rates by Occupation (continued)

| SOC Code | SOC Title | Questions | Response Rate |
| :---: | :---: | :---: | :---: |
| 43-1011.00 | First-Line Supervisors of Office and Administrative Support Workers | 19,462 | 98.6 |
| 43-3031.00 | Bookkeeping, Accounting, and Auditing Clerks | 18,124 | 97.5 |
| 43-3051.00 | Payroll and Timekeeping Clerks | 18,238 | 96.9 |
| 43-3061.00 | Procurement Clerks | 11,557 | 98.1 |
| 43-4021.00 | Correspondence Clerks | 13,155 | 97.1 |
| 43-4061.00 | Eligibility Interviewers, Government Programs | 11,640 | 97.6 |
| 43-4081.00 | Hotel, Motel, and Resort Desk Clerks | 17,141 | 97.5 |
| 43-4131.00 | Loan Interviewers and Clerks | 7,287 | 98.1 |
| 43-4151.00 | Order Clerks | 14,820 | 98.0 |
| 43-4161.00 | Human Resources Assistants, Except Payroll and Timekeeping | 12,070 | 98.3 |
| 43-5021.00 | Couriers and Messengers | 7,231 | 95.8 |
| 43-5031.00 | Police, Fire, and Ambulance Dispatchers | 15,206 | 98.0 |
| 43-5041.00 | Meter Readers, Utilities | 9,459 | 98.0 |
| 43-5051.00 | Postal Service Clerks | 12,041 | 98.0 |
| 43-5052.00 | Postal Service Mail Carriers | 14,236 | 97.5 |
| 43-5053.00 | Postal Service Mail Sorters, Processors, and Processing Machine Operators | 11,170 | 96.4 |
| 43-5081.01 | Stock Clerks, Sales Floor | 9,891 | 97.9 |
| 43-5081.03 | Stock Clerks- Stockroom, Warehouse, or Storage Yard | 17,153 | 97.8 |
| 43-5081.04 | Order Fillers, Wholesale and Retail Sales | 6,852 | 97.7 |
| 43-6011.00 | Executive Secretaries and Executive Administrative Assistants | 18,358 | 98.4 |
| 43-9022.00 | Word Processors and Typists | 11,240 | 98.0 |
| 43-9041.01 | Insurance Claims Clerks | 10,248 | 98.0 |
| 43-9051.00 | Mail Clerks and Mail Machine Operators, Except Postal Service | 11,905 | 96.9 |
| 43-9071.00 | Office Machine Operators, Except Computer | 6,396 | 96.5 |
| 43-9081.00 | Proofreaders and Copy Markers | 5,289 | 98.2 |
| 43-9111.00 | Statistical Assistants | 12,713 | 98.6 |
| 45-1011.08 | First-Line Supervisors of Animal Husbandry and Animal Care Workers | 8,474 | 96.6 |
| 45-2041.00 | Graders and Sorters, Agricultural Products | 4,592 | 94.8 |
| 45-2092.01 | Nursery Workers | 8,097 | 97.1 |
| 45-4022.00 | Logging Equipment Operators | 5,519 | 96.5 |
| 45-4023.00 | Log Graders and Scalers | 7,970 | 98.4 |
| 47-2011.00 | Boilermakers | 8,846 | 97.5 |

Exhibit D-11. Item Response Rates by Occupation (continued)

| SOC Code | SOC Title | Questions | Response Rate |
| :---: | :---: | :---: | :---: |
| 47-2053.00 | Terrazzo Workers and Finishers | 9,342 | 96.1 |
| 47-2081.00 | Drywall and Ceiling Tile Installers | 10,544 | 96.3 |
| 47-2082.00 | Tapers | 8,146 | 95.4 |
| 47-2131.00 | Insulation Workers, Floor, Ceiling, and Wall | 6,961 | 97.7 |
| 47-2151.00 | Pipelayers | 10,302 | 97.7 |
| 47-2161.00 | Plasterers and Stucco Masons | 8,484 | 97.5 |
| 47-2171.00 | Reinforcing Iron and Rebar Workers | 6,642 | 97.0 |
| 47-2181.00 | Roofers | 10,579 | 95.1 |
| 47-2221.00 | Structural Iron and Steel Workers | 13,640 | 97.6 |
| 47-4041.00 | Hazardous Materials Removal Workers | 9,121 | 96.9 |
| 47-4051.00 | Highway Maintenance Workers | 8,599 | 96.2 |
| 47-4061.00 | Rail-Track Laying and Maintenance Equipment Operators | 9,349 | 96.9 |
| 47-4071.00 | Septic Tank Servicers and Sewer Pipe Cleaners | 8,933 | 96.4 |
| 47-4099.52 | Solar Thermal Installers and Technicians | 7,374 | 98.1 |
| 47-5021.00 | Earth Drillers, Except Oil and Gas | 7,716 | 98.6 |
| 47-5041.00 | Continuous Mining Machine Operators | 8,828 | 98.2 |
| 47-5061.00 | Roof Bolters, Mining | 5,387 | 98.2 |
| 49-2011.00 | Computer, Automated Teller, and Office Machine Repairers | 10,124 | 98.6 |
| 49-2022.00 | Telecommunications Equipment Installers and Repairers, Except Line Installers | 11,162 | 98.0 |
| 49-2091.00 | Avionics Technicians | 10,293 | 98.7 |
| 49-2092.00 | Electric Motor, Power Tool, and Related Repairers | 11,178 | 95.8 |
| 49-2095.00 | Electrical and Electronics Repairers, Powerhouse, Substation, and Relay | 9,253 | 98.6 |
| 49-2096.00 | Electronic Equipment Installers and Repairers, Motor Vehicles | 7,511 | 98.8 |
| 49-2098.00 | Security and Fire Alarm Systems Installers | 8,418 | 98.7 |
| 49-3041.00 | Farm Equipment Mechanics and Service Technicians | 11,563 | 98.0 |
| 49-3042.00 | Mobile Heavy Equipment Mechanics, Except Engines | 20,296 | 97.8 |
| 49-3051.00 | Motorboat Mechanics and Service Technicians | 12,800 | 98.7 |
| 49-3091.00 | Bicycle Repairers | 5,724 | 98.5 |
| 49-3092.00 | Recreational Vehicle Service Technicians | 13,616 | 98.0 |
| 49-9011.00 | Mechanical Door Repairers | 16,270 | 97.7 |
| 49-9012.00 | Control and Valve Installers and Repairers, Except Mechanical Door | 14,649 | 96.2 |
| 49-9043.00 | Maintenance Workers, Machinery | 15,557 | 98.8 |

Exhibit D-11. Item Response Rates by Occupation (continued)

| SOC Code | SOC Title | Questions | Response Rate |
| :---: | :---: | :---: | :---: |
| 49-9052.00 | Telecommunications Line Installers and Repairers | 12,178 | 97.6 |
| 49-9061.00 | Camera and Photographic Equipment Repairers | 6,009 | 97.5 |
| 49-9091.00 | Coin, Vending, and Amusement Machine Servicers and Repairers | 8,446 | 96.5 |
| 49-9092.00 | Commercial Divers | 9,540 | 97.8 |
| 51-2011.00 | Aircraft Structure, Surfaces, Rigging, and Systems Assemblers | 14,653 | 96.7 |
| 51-2021.00 | Coil Winders, Tapers, and Finishers | 5,634 | 98.1 |
| 51-2023.00 | Electromechanical Equipment Assemblers | 7,497 | 98.7 |
| 51-3011.00 | Bakers | 10,617 | 96.0 |
| 51-3021.00 | Butchers and Meat Cutters | 8,508 | 95.2 |
| 51-3022.00 | Meat, Poultry, and Fish Cutters and Trimmers | 6,235 | 97.3 |
| 51-3023.00 | Slaughterers and Meat Packers | 5,206 | 96.2 |
| 51-3091.00 | Food and Tobacco Roasting, Baking, and Drying Machine Operators and Tenders | 8,419 | 96.5 |
| 51-4012.00 | Computer Numerically Controlled Machine Tool Programmers, Metal and Plastic | 8,258 | 98.0 |
| 51-4021.00 | Extruding and Drawing Machine Setters, Operators, and Tenders, Metal and Plastic | 7,711 | 98.3 |
| 51-4022.00 | Forging Machine Setters, Operators, and Tenders, Metal and Plastic | 5,270 | 98.4 |
| 51-4031.00 | Cutting, Punching, and Press Machine Setters, Operators, and Tenders, Metal and Plastic | 20,250 | 95.8 |
| 51-4033.00 | Grinding, Lapping, Polishing, and Buffing Machine Tool Setters, Operators, and Tenders, Metal and Plastic | 9,932 | 97.8 |
| 51-4034.00 | Lathe and Turning Machine Tool Setters, Operators, and Tenders, Metal and Plastic | 10,632 | 97.1 |
| 51-4035.00 | Milling and Planing Machine Setters, Operators, and Tenders, Metal and Plastic | 7,906 | 97.4 |
| 51-4061.00 | Model Makers, Metal and Plastic | 7,013 | 97.7 |
| 51-4062.00 | Patternmakers, Metal and Plastic | 8,019 | 97.6 |
| 51-4071.00 | Foundry Mold and Coremakers | 8,826 | 95.9 |
| 51-4072.00 | Molding, Coremaking, and Casting Machine Setters, Operators, and Tenders, Metal and Plastic | 14,915 | 95.2 |
| 51-4121.07 | Solderers and Brazers | 7,602 | 97.6 |
| 51-4122.00 | Welding, Soldering, and Brazing Machine Setters, Operators, and Tenders | 11,686 | 98.7 |
| 51-4191.00 | Heat Treating Equipment Setters, Operators, and Tenders, Metal and Plastic | 9,640 | 98.1 |
|  |  |  | (continued) |

Exhibit D-11. Item Response Rates by Occupation (continued)

| SOC Code | SOC Title | Questions | Response Rate |
| :---: | :---: | :---: | :---: |
| 51-4193.00 | Plating and Coating Machine Setters, Operators, and Tenders, Metal and Plastic | 13,183 | 96.3 |
| 51-4194.00 | Tool Grinders, Filers, and Sharpeners | 8,372 | 97.3 |
| 51-5111.00 | Prepress Technicians and Workers | 12,768 | 97.7 |
| 51-5113.00 | Print Binding and Finishing Workers | 10,698 | 97.1 |
| 51-6011.00 | Laundry and Dry-Cleaning Workers | 11,687 | 90.8 |
| 51-6021.00 | Pressers, Textile, Garment, and Related Materials | 9,183 | 90.3 |
| 51-6031.00 | Sewing Machine Operators | 14,749 | 93.5 |
| 51-6092.00 | Fabric and Apparel Patternmakers | 7,088 | 97.3 |
| 51-6093.00 | Upholsterers | 7,123 | 96.8 |
| 51-7011.00 | Cabinetmakers and Bench Carpenters | 7,786 | 97.0 |
| 51-7021.00 | Furniture Finishers | 8,662 | 97.7 |
| 51-7042.00 | Woodworking Machine Setters, Operators, and Tenders, Except Sawing | 12,974 | 96.6 |
| 51-8091.00 | Chemical Plant and System Operators | 13,337 | 97.5 |
| 51-8099.51 | Biofuels Processing Technicians | 10,177 | 98.1 |
| 51-8099.54 | Hydroelectric Plant Technicians | 26,187 | 97.9 |
| 51-9011.00 | Chemical Equipment Operators and Tenders | 9,579 | 99.1 |
| 51-9012.00 | Separating, Filtering, Clarifying, Precipitating, and Still Machine Setters, Operators, and Tenders | 11,535 | 97.5 |
| 51-9021.00 | Crushing, Grinding, and Polishing Machine Setters, Operators, and Tenders | 14,150 | 96.9 |
| 51-9022.00 | Grinding and Polishing Workers, Hand | 10,647 | 94.3 |
| 51-9032.00 | Cutting and Slicing Machine Setters, Operators, and Tenders | 16,497 | 96.7 |
| 51-9041.00 | Extruding, Forming, Pressing, and Compacting Machine Setters, Operators, and Tenders | 14,528 | 96.7 |
| 51-9051.00 | Furnace, Kiln, Oven, Drier, and Kettle Operators and Tenders | 8,942 | 97.2 |
| 51-9082.00 | Medical Appliance Technicians | 11,229 | 97.1 |
| 51-9083.00 | Ophthalmic Laboratory Technicians | 11,131 | 97.1 |
| 51-9111.00 | Packaging and Filling Machine Operators and Tenders | 9,599 | 95.3 |
| 51-9121.00 | Coating, Painting, and Spraying Machine Setters, Operators, and Tenders | 6,157 | 96.8 |
| 51-9151.00 | Photographic Process Workers and Processing Machine Operators | 9,927 | 98.6 |
| 51-9191.00 | Adhesive Bonding Machine Operators and Tenders | 7,426 | 97.9 |
| 51-9192.00 | Cleaning, Washing, and Metal Pickling Equipment Operators and Tenders | 5,510 | 96.9 |

(continued)

Exhibit D-11. Item Response Rates by Occupation (continued)

| SOC Code | SOC Title | Questions | Response Rate |
| :---: | :---: | :---: | :---: |
| 51-9193.00 | Cooling and Freezing Equipment Operators and Tenders | 8,205 | 97.8 |
| 51-9194.00 | Etchers and Engravers | 8,641 | 96.0 |
| 51-9195.03 | Stone Cutters and Carvers, Manufacturing | 10,900 | 95.7 |
| 51-9195.04 | Glass Blowers, Molders, Benders, and Finishers | 7,716 | 98.9 |
| 51-9195.07 | Molding and Casting Workers | 10,278 | 97.6 |
| 51-9198.00 | Helpers--Production Workers | 13,714 | 94.6 |
| 53-1011.00 | Aircraft Cargo Handling Supervisors | 5,770 | 97.2 |
| 53-1021.00 | First-Line Supervisors of Helpers, Laborers, and Material Movers, Hand | 14,004 | 98.5 |
| 53-2012.00 | Commercial Pilots | 14,846 | 98.4 |
| 53-3011.00 | Ambulance Drivers and Attendants, Except Emergency Medical Technicians | 6,293 | 97.5 |
| 53-3041.00 | Taxi Drivers and Chauffeurs | 13,083 | 96.8 |
| 53-4011.00 | Locomotive Engineers | 7,911 | 97.4 |
| 53-5011.00 | Sailors and Marine Oilers | 10,761 | 96.5 |
| 53-5021.01 | Ship and Boat Captains | 15,867 | 97.3 |
| 53-5021.02 | Mates- Ship, Boat, and Barge | 8,433 | 97.5 |
| 53-5021.03 | Pilots, Ship | 8,032 | 97.0 |
| 53-5031.00 | Ship Engineers | 10,293 | 96.7 |
| 53-6021.00 | Parking Lot Attendants | 8,489 | 96.6 |
| 53-6031.00 | Automotive and Watercraft Service Attendants | 9,603 | 97.9 |
| 53-6041.00 | Traffic Technicians | 10,466 | 97.5 |
| 53-6051.07 | Transportation Vehicle, Equipment and Systems Inspectors, Except Aviation | 6,773 | 97.7 |
| 53-6061.00 | Transportation Attendants, Except Flight Attendants | 6,118 | 96.9 |
| 53-7011.00 | Conveyor Operators and Tenders | 12,941 | 97.7 |
| 53-7021.00 | Crane and Tower Operators | 11,680 | 97.7 |
| 53-7063.00 | Machine Feeders and Offbearers | 12,113 | 97.3 |
| 53-7071.00 | Gas Compressor and Gas Pumping Station Operators | 5,561 | 97.5 |

[^0]:    ${ }^{1}$ A total of 18 analysis cycles have been completed through June 2017. An analysis of nonresponse in Analysis Cycles 1-3 was included in the September 2005 Office of Management and Budget submission (Appendix E); an analysis of nonresponse in Cycles 4-8 was included in the December 2008 Office of Management and Budget submission (Appendix H); an analysis of nonresponse in Cycles 9-12 was included in the April 2012 Office of Management and Budget submission (Appendix E); and an analysis of nonresponse in Cycles 13-15 was included in the August 2015 Office of Management and Budget submission (Appendix E).

[^1]:    ${ }^{2}$ For a discussion of weighting, see Section B.1.1 in Part B of the Supporting Statement.

[^2]:    ${ }^{3}$ Establishments that had employee sampling suspended for all assigned occupations are not included in the establishment nonresponse analysis. See Section B.1.1 for a description of these procedures.
    ${ }^{4}$ Based on logistic regression modeling results of establishment-level response propensity.

[^3]:    ${ }^{5}$ Unweighted rates were used because appropriate weights were not available for ineligible or nonresponding establishments.
    ${ }^{6}$ The tests were conditioned on the overall rates because the objective was to identify any subgroups that differed from the observed overall rate.

[^4]:    ${ }^{7}$ Response rate patterns by SIC Division and NAICS Sector were highly dependent on the occupations included in a particular collection of occupations. These findings would not, therefore, necessarily apply to a different set of occupations in another analysis cycle.
    ${ }^{8}$ Absolute difference is the absolute value of the final column of Exhibit D-2.

[^5]:    ${ }^{9}$ Unweighted rates were used because appropriate weights were not available for nonresponding employees.

[^6]:    ${ }^{10}$ Based on logistic regression modeling results of both establishment-level and employee-level response propensity.
    ${ }^{11}$ The tests were conditioned on the overall rates because the objective was to identify any subgroups that differed from the observed overall rate.
    ${ }^{12}$ The response rate for NAICS Sector Management of Companies and Enterprises was 100\%, but because only three employees were sampled, this figure was not considered a reliable estimate.

[^7]:    ${ }^{13}$ Because no Military Specific Occupations were included among the occupations in Analysis Cycles 16-18, the response rate of $0 \%$ is not applicable to this analysis.
